

PRESS RELEASE

**Elias Papanikolaou**

**Open Window**

28 September – 2 November 2024

**Ikastikos Kiklos DL** presents on **Saturday 28 September 2024** the **solo exhibition** of **Elias Papanikolaou** titled « **Open Window** ».

The series of artworks presented in the exhibition are something like pages of a diary that narrate snapshots of a view. The associations are clearly summer. Summer works as a constant in my inspiration. Things are stripped bare in the summer and revealed. As if they're being simplified for the sake of my painting. Their geometry unfolds and they come to life with the slightest breeze blowing them.

The summer helps me to paint the worlds I am addressing whether it's landscape or the combinations with figures. I'm interested in the clear image in my art and the element of the sea, for example, feeds me in an inexhaustible way as an artist. The sea has this fluidity and creates spaces within my paintings in a way that always serves the end result I want to reach. The worlds of this painting look like an open window...
