

PRESS RELEASE

**Evi Zampeli**

**What happened?**

18 January – 19 February 2022

In her first solo show, Evi Zampeli presents the main body of her artistic creation through a set of paintings. The landscapes she captures on large-scale canvases are occupied by dazzling and bright colors - almost fake, generating to the viewer the sensation of a dream. Using strict methodology during her production line, she composes with laborious conception various sketches with pencil and watercolor, before reaching the very last composition of her landscapes.

With dreamy elements and monumental sizes, Zampeli marks on the canvases what we all experience with awkwardness: the state of limbo. The abandoned buildings standing in the middle of her compositions, are waiting to connect with the observer, thus putting him in a state of waiting and inactivity, while at the same time intoxicated by the nearly "fake colors" of her dreams.
